

Estimating of Compressor Unit Engine

- ① 4 pieces of piston \rightarrow $\text{N}12,000 \times 4 = \text{N}48,000$
- ② 4 Set of piston rings \rightarrow $\text{N}10,000 \times 4 = \text{N}40,000$
- ③ 6 Set of metal machining \rightarrow $\text{N}2,000$
- ④ 4 Set of connecting rod bearing \rightarrow $\text{N}15,000$
- ⑤ Complete Overhauled gasket \rightarrow $\text{N}35,000$
- ⑥ Front and back Crankshaft oil Seal \rightarrow $\text{N}13,000$
- ⑦ Fuel filter \rightarrow $\text{N}4,000$
- ⑧ Oil filter \rightarrow $\text{N}4,500$
- ⑨ 1 air filter \rightarrow $\text{N}5,000$
- ⑩ 3 gallon of Engine oil \rightarrow $\text{N}7,500 \times 3 = \text{N}22,500$
- ⑪ Working on the top Cylinder \rightarrow $\text{N}7,000$
- ⑫ V-belt Seal \rightarrow $\text{N}6,000$
- ⑬ Calibrating of Ejector pump and Nozzle tips \rightarrow $\text{N}6,000$
- ⑭ Tying of Crankshaft \rightarrow $\text{N}5,000$
- ⑮ 1 gallon of radiator coolant \rightarrow $\text{N}4,000$
- ⑯ Washing of radiator and hydraulic oil coolant \rightarrow $\text{N}15,000$
- ⑰ Trust washer \rightarrow $\text{N}6,500$
- ⑱ Compressor coupling drive \rightarrow $\text{N}60,000$
- ⑲ Block \rightarrow $\text{N}280,000$
- ⑳ 30 liters of diesel \rightarrow $\text{N}8,250$
- ㉑ 20 liters of fuel \rightarrow $\text{N}3,500$
- ㉒ Labour \rightarrow $\text{N}200,000$
