Dear Timothy,

My CUG phone has developed some faults. Initially the battery got spoilt and it was replaced. Now you can charge the battery and the phone will be on but no network. I have taken it out for repairs but all to no avail.

Looking at the importance of phone to our daily operations, I request that the phone be changed as people have been complaining of not being able to reach me in the past few weeks that the fault has been troubling me.

Thanks for your understanding.

Regards.

Ndubuishi, FA
Project Engineer

The phone is not good for purpose.
needs replacement. The last time
a phone was issued to him was ~~12/1/16~~ 12/1/16
